How to add Microsoft Kernel-Mode Driver Framework 1.11 (KB 2685811) to your Windows 10 image To add the Kernel-Mode Driver Framework (KB2685811) to your Windows 10 image, you first need to install the packages: Microsoft Visual C++ 2015 for Windows 10 and Microsoft Visual C++ 2016 for Windows 10. To do this, run the command: sfc /scannow. You will then be prompted to restart your computer. After reboot, run the command: rstrui.exe /resetauthorization and wait for completion. To see additional options on the command line, type: rstrui.exe /?
